Dear Sir:

Please find enclosed the corrected Part A of the Hazardous Waste Permit Application in response to a notice received on June 19, 1981 indicating an inconsistency in the original notification. Please note that the Process Design Codes for Items 2 and 3 were incorrectly listed as T02, surface impoundment, when they are in fact S02, storage tanks. Item #2, the 5,000 gallon tank, is located inside the plant in a pit enclosure and is to be used for the temporary storage of spent metal etching solution, F009. Because the information in Part IV relating to the process code for F009 waste was also listed incorrectly, a corrected copy of this section is also attached. Item #3, a 10,000 gallon holding tank, is part of the secondary containment system for the hazardous waste drum storage facility.

I regret this mistake and trust that this adequately clarifies the situation. Should you need any additional information please do not hesitate to contact me.

Respectfully,

ROGERS CORPORATION

Gentlemen:

Please find enclosed, forms one and three of the application for a Hazardous Waste Permit. Also attached are pertinent photos and drawings.

Hazardous wastes are stored either in bulk tank or in fifty-five gallon drums until sufficient quantity is attained for shipment through a licensed transporter to a certified disposal site. The majority of waste items listed on form three are generated in small quantity by Research and Development. The largest quantity of waste is generated by production which is also located at this facility. Fifty-five gallon drums are stored in a secure storage area. Bulk waste, which is predominantly spent etchant, is stored in tank form in a pit which was once part of an integrated system for a plating line. Plating equipment in this area was removed approximately two to three years ago, however storage tanks below floor level were kept for hazardous waste storage.

Should you have need for additional information feel free to call either myself or the Divisional contact.

Respectfully,

ROGERS CORPORATION

I. PROCESSES (continued)

SPACE FOR ADDITIONAL PROCESS CODES OR FOR DESCRIBING OTHER PROCESSES (code "100"). FOR EACH PROCESS ENTERED HERE INCLUDE DESIGN CAPACITY.

II. DESCRIPTION OF HAZARDOUS WASTES

EPA HAZARDOUS WASTE NUMBER — Enter the four-digit number from 40 CFR, Subpart D for each listed hazardous waste you will handle. If you handle hazardous wastes which are not listed in 40 CFR, Subpart D, enter the four-digit number(s) from 40 CFR, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

ESTIMATED ANNUAL QUANTITY — For each listed waste entered in column A estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

UNIT OF MEASURE — For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

III. PROCESSES

1. PROCESS CODES:

For listed hazardous waste: For each listed hazardous waste entered in column A select the code(s) from the list of process codes contained in Item III to indicate how the waste will be stored, treated, and/or disposed of at the facility.

For non-listed hazardous wastes: For each characteristic or toxic contaminant entered in column A, select the code(s) from the list of process codes contained in Item III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

Note: Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described above; (2) Enter "000" in the extreme right box of Item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code(s).

2. PROCESS DESCRIPTION: If a code is not listed for a process that will be used, describe the process in the space provided on the form.

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER — Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

1. Select one of the EPA Hazardous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
2. In column A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In column D(2) on that line enter "included with above" and make no other entries on that line.
3. Repeat step 2 for each other EPA Hazardous Waste Number that can be used to describe the hazardous waste.

SAMPLE FOR COMPLETING ITEM IV (shown in line numbers X-1, X-2, X-3, and X-4 below) — A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 10 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.
